

## What is RenWeb?

This fall, St. Gregory the Great Catholic School launches a new school management software system that connects teachers, administrators and parents via the internet. This private and secure software allows St. Gregory the Great to maintain data including student attendance, classroom grades and homework assignments. Parents can easily check on their child's progress, review their child's homework assignments and communicate quickly with teachers. Rest assured, St. Gregory the Great Catholic School teachers and staff remain committed to personal communication with you. RenWeb is simply another communication tool for parents, teachers and administrators.
